

Handbook - 1998 Edition

Optimizing Water Treatment Plant
Performance Using the
Composite Correction Program

**Office of Research and Development
Technology Transfer and Support Division
National Risk Management Research Laboratory
U.S. Environmental Protection Agency
Cincinnati, Ohio 45268**

Notice

This document has been reviewed in accordance with the U.S. Environmental Protection Agency's peer and administrative review policies and approved for publication. Mention of trade names or commercial products does not constitute endorsement or recommendation for use.

Acknowledgments

This handbook was prepared for the United States Environmental Protection Agency (U.S. EPA) by Process Applications, Inc. Although many individuals contributed to the preparation and review of this document, the assistance of the individuals listed below is especially acknowledged.

Major Authors:

Bob A. Hegg and Larry D. DeMers, Process Applications, Inc., Fort Collins, Colorado
Jon H. Bender, Eric M. Bissonette, and Richard J. Lieberman, U.S. EPA Office of Groundwater and Drinking Water (OGWDW) Technical Support Center (TSC), Cincinnati, Ohio

Project Managers:

James E. Smith, Jr., U.S. EPA Office of Research and Development, Technology Transfer and Support Division, National Risk Management Research Laboratory (NRMRL)
Jon H. Bender, U.S. EPA OGWDW, TSC, Cincinnati, Ohio

Reviewers:

Frank Evans, U.S. EPA, NRMRL, Cincinnati, Ohio
Julie Z. LeBlanc, U.S. Army Corps of Engineers, New Orleans, Louisiana
David Parker, U.S. EPA, Region IV, Atlanta, Georgia
Chuck Schwarz, Texas Natural Resource Conservation Commission, Tyler, Texas
Jeff Robichaud, U.S. EPA, OGWDW, Washington, D.C.

Editing and Production:

M. Lynn Kelly, Process Applications, Inc., Fort Collins, Colorado

Chapter	Page
Acknowledgments	iii
List of Figures	x
List of Tables	xi
1 Introduction	1
1.1 Purpose.....	1
1.2 Background.....	1
1.2.1 Wastewater Treatment Compliance	1
1.2.2 Water Treatment Optimization	2
1.2.3 Broad-Scale Application of CCP Concepts.....	2
1.3 Scope.....	3
1.3.1 Update of the CCP Approach and Implementation.....	3
1.3.2 Support for Future Regulations.....	3
1.3.3 Technical Resource for the <i>Partnership for Safe Water</i>	4
1.3.4 Considerations for Total System Optimization.....	4
1.4 Using the Manual.....	4
1.5 References	4
2 Protection Of Public Health From Microbial Pathogens	7
2.1 Background.....	7
2.2 Waterborne Disease History.....	7
2.3 Relationship Between Optimized Performance and Public Health Protection	8
2.3.1 Multiple Barrier Strategy	8
2.3.2 Basis for Optimization Goals.....	9
2.4 Optimization Performance Goals.....	10
2.4.1 Minimum Data Monitoring Requirements	10
2.4.2 Individual Sedimentation Basin Performance Goals	10
2.4.3 Individual Filter Performance Goals.....	10
2.4.4 Disinfection Performance Goal	11
2.5 Role of the Water Treatment Plant Staff in Public Health Protection	11
2.6 References	11
3 Assessing Composite Correction Program Application.....	13
3.1 Introduction	13
3.2 Optimization Program Experience.....	13
3.3 Area-Wide Optimization Model.....	14
3.3.1 Status Component	14
3.3.2 Evaluation Component.....	14
3.3.3 Follow-Up Component	14
3.3.4 Maintenance Component.....	14
3.4 Implementation of an Area-Wide Model	14
3.4.1 Establish Criteria to Prioritize Water Systems	16
3.4.2 Assess Water System Performance Relative to Optimization Goals	16
3.4.3 Prioritize Water Systems Based on Selected Criteria	17
3.4.4 Assess Response to Prioritized Water Systems	18
3.5 References	19

Contents (continued)

Chapter		Page
4	Comprehensive Performance Evaluation.....	21
4.1	Introduction	21
4.2	CPE Methodology.....	21
4.2.1	Assessment of Plant Performance.....	21
4.2.1.1	Review and Trend Charting of Plant Operating Records	21
4.2.1.2	Supplemental Data Collection	22
4.2.2	Evaluation of Major Unit Processes.....	25
4.2.2.1	Overview	25
4.2.2.2	Approach.....	27
4.2.2.3	Determining Peak Instantaneous Operating Flow.....	28
4.2.2.4	Rating Individual Unit Processes.....	29
	Flocculation.....	30
	Sedimentation	30
	Filtration	31
	Disinfection	32
	Post-Disinfection	32
	Pre-Disinfection	34
4.2.3	Identification and Prioritization of Performance Limiting Factors.....	35
4.2.3.1	Identification of Performance Limiting Factors	35
	Identification of Administrative Factors.....	36
	Policies	37
	Budgeting	38
	Staffing	38
	Identification of Design Factors	38
	Identification of Operational Factors	39
	Plant Flow Rate and Number of Basins in Service	39
	Chemical Dose Control	39
	Filter Control.....	40
	Process Control Activities.....	41
	Other Controls	42
	Identification of Maintenance Factors	42
	4.2.3.2 Prioritization of Performance Limiting Factors.....	42
4.2.4	Assessment of the Applicability of a CTA.....	44
4.2.5	CPE Report.....	44
4.3	Conducting a CPE	44
4.3.1	Overview	49
4.3.2	Initial Activities.....	49
4.3.2.1	Key Personnel	50
4.3.2.2	CPE Resources	50
4.3.2.3	Scheduling	50
4.3.3	On-Site Activities	51
4.3.3.1	Kick-Off Meeting	51
4.3.3.2	Plant Tour	51
	Pretreatment	52
	Mixing/Flocculation/Sedimentation	52
	Chemical Feed Facilities.....	53
	Filtration	53
	Disinfection	54
	Backwash Water and Sludge Treatment and Disposal	54
	Laboratory	54
	Maintenance	54
